# Remove the OEM chip and reinstalled
Tools：the screwdriver（"-"type）

1-2：use the screwdriver gently tilted one side first, stop when you feel it loose, and then use the same ways to handel the other side.

Residue

3-4. you can see it have some residue on the chip when you teardown so must be make it clear, but don't broken the chip.

此处需加装感光配件的,一定要加上

芯片方向
要贴对

5. stick the double-sided adhesive on the chip

6. stick the chip on the position as show

Note：if the printer can not recognize cartridges, you can use below ways：
1：take out the cartridges and close the cover
2：shut off the power
3：turn on the printer
4：inster the cartridges and close the cover is ok
